## FLOOD DEFENCE BARRIERS FOR PUBLIC DWELLINGS

Flooding is a serious problem in the United Kingdom and is becoming a regular event.

We are a Redditch based company with over 20 years of specialist manufacturing and experience of Flood Barriers.

### Operation and Maintenance

The demountable barriers are manufactured from light aluminium material and can be easily located into the relevant frame slides by hand. Each slide has a low plastic resilient seal and each barrier will be complete with an interlocking horizontal seal.

Frames are provided with a locking pin and padlock to prevent unauthorized removal.

Generally frames are offered in Mild Steel construction, shot blasted to a SA2-1/2 standard and coated with an outside paint system. Unless specified this colour will be black.

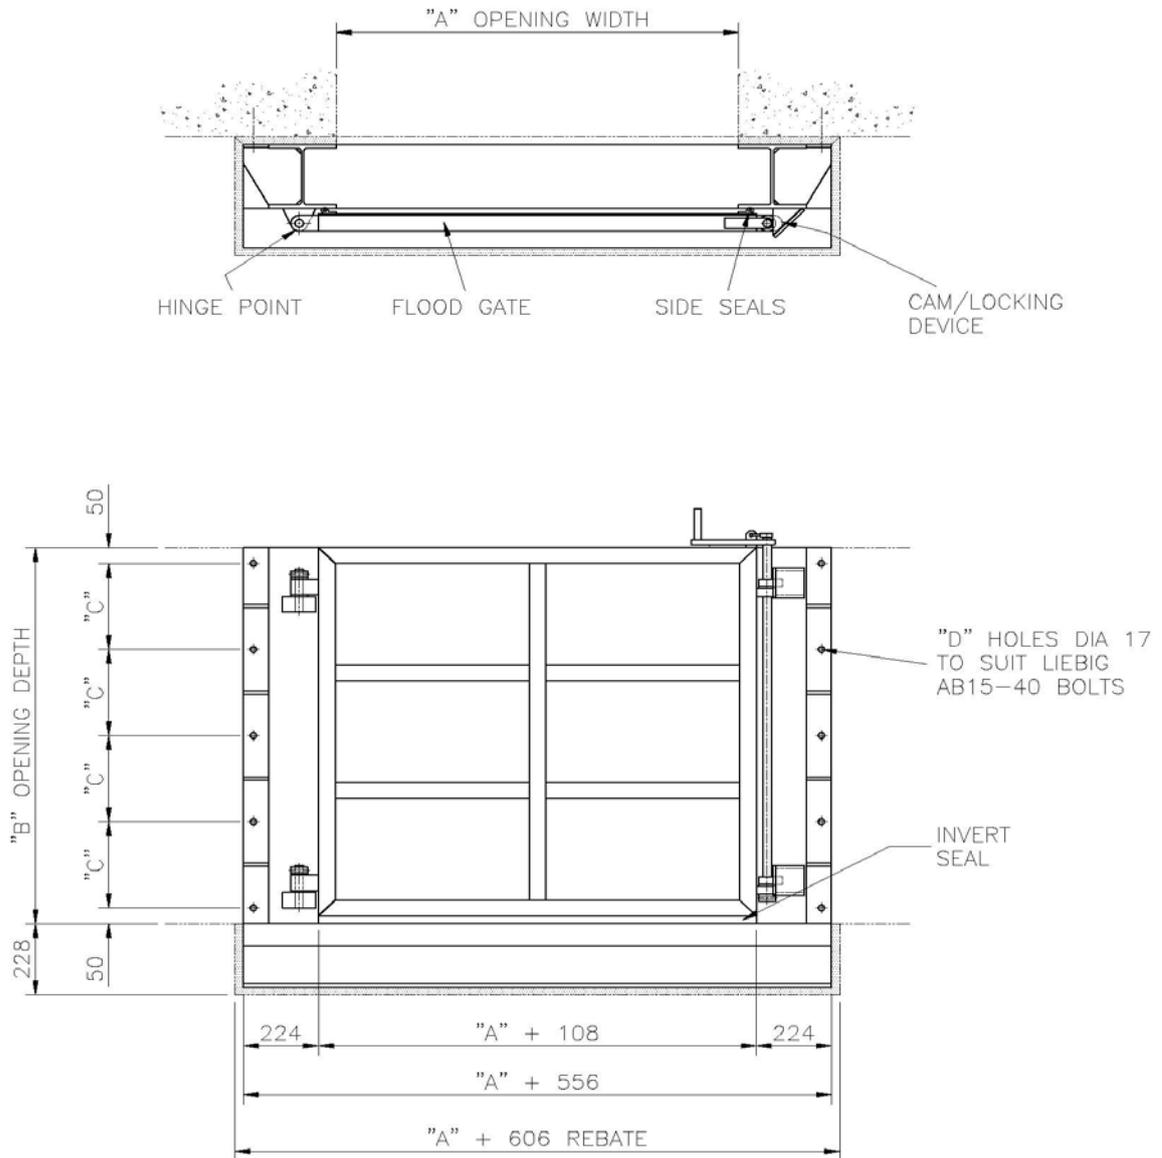

The barriers offered are strong, unobtrusive and non-corrosive.

The demountable barriers stack in multiples of 180mm allowing you to increase or decrease the level of flood protection in seconds as water levels rise and fall

FLOOD DEFENCE BARRIERS

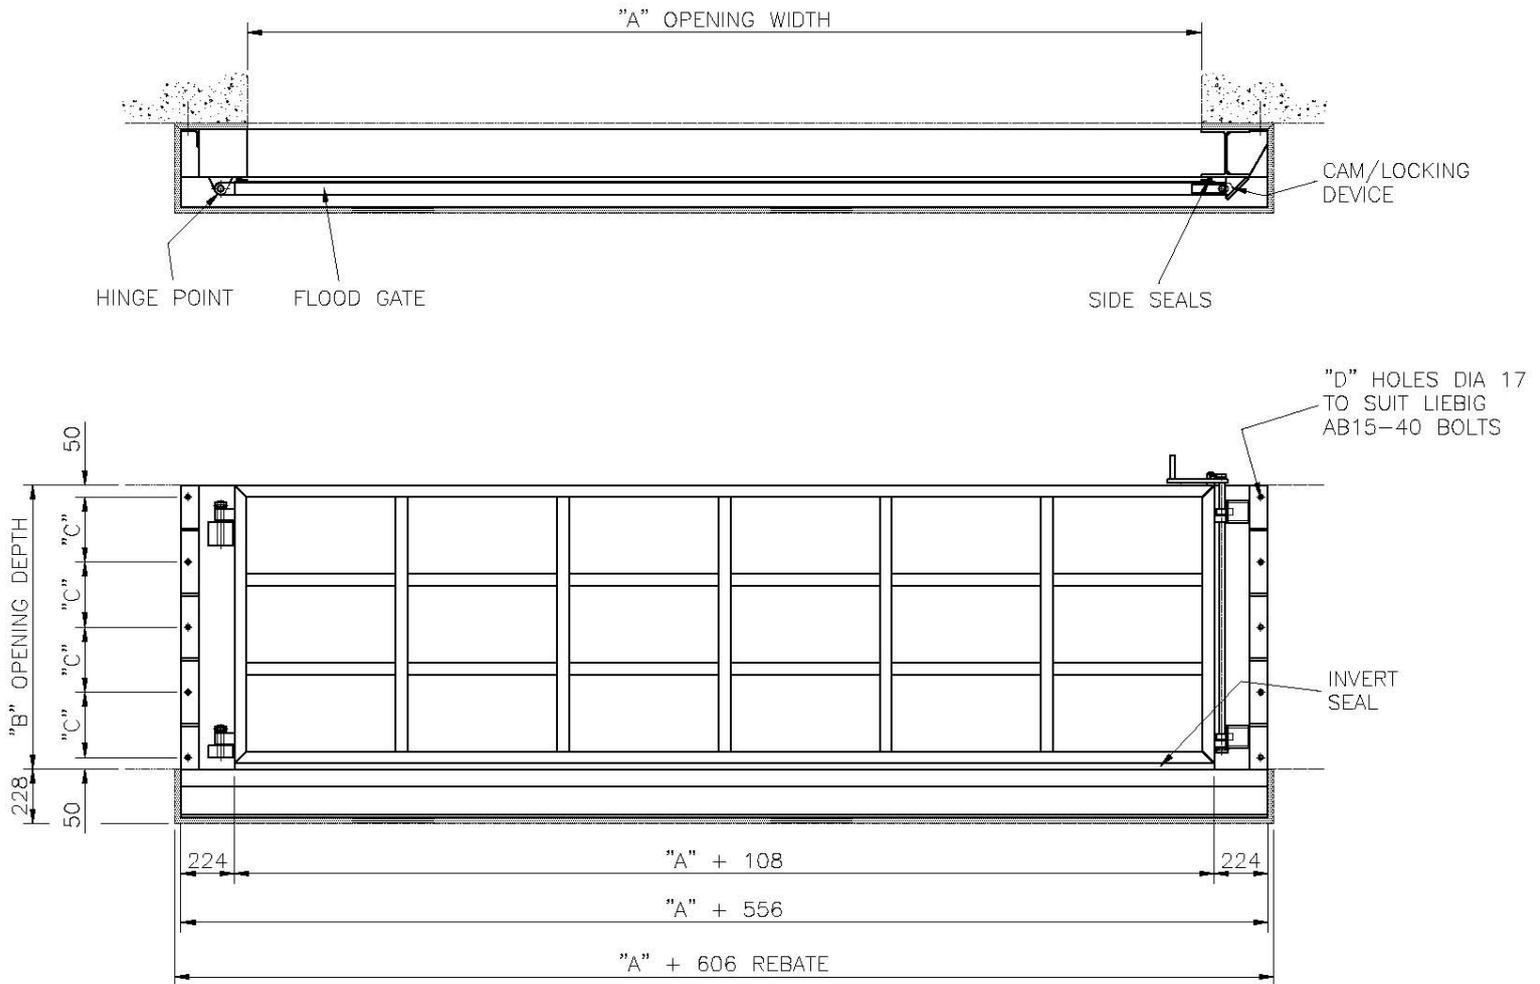

# FLOOD DEFENCE BARRIERS

## LIGHT DUTY - HINGED TYPE

Construction Materials		
Item	Description	Materials
1	Main Frame	GMS, PMS, 304ss, 316ss
2	Barrier	GMS, PMS, 304ss, 316ss, Timber, Aluminium, HDPE
3	Construction Screws	A4
4	Fixing Bolts	ZPS, A4
5	Seals	Neoprene
6	Guides	HDPE
